📄 Overview

This project presents an interactive **Sales Analysis Dashboard** built using Microsoft Excel. The dashboard provides a comprehensive view of business performance by analysing revenue, customer behaviour, product performance, geographical distribution, and time-based trends.

It is designed to support **data-driven decision-making** for improving sales strategy, marketing effectiveness, and operational efficiency.

💰 Key Metrics (KPIs)

- **Total Revenue:** ₹35,20,984
- **Total Orders:** 1000
- **Average Customer Spending:** ₹3,520.98
- **Average Delivery Time:** 5.53 days

📦 Product Category Insights

- **Top Performing Categories:** Colours, Soft Toys, Sweets
- **Low Performing Categories:** Plants, Mugs

📌 *Insight:*
High-demand categories are driving revenue, while underperforming categories may require better pricing strategies or promotional efforts.

🎉 Occasion-Based Analysis

- **Top Occasions:** Anniversary, Raksha Bandhan
- **Low Performance:** Diwali, Valentine's Day

📌 *Insight:*
Sales are strongly influenced by emotional and family-oriented occasions. Some major festivals show untapped potential for marketing improvements.

🌍 Geographical Insights

- **Top Cities:** Imphal, Dhanbad, Kavali

📌 *Insight:*
Tier-2 and Tier-3 cities contribute significantly to revenue, indicating strong growth opportunities in these regions.

📅 Monthly Sales Trends

- **Peak Months:** February, August
- **Low Activity Period:** April to July

📌 *Insight:*
The business experiences seasonal fluctuations. Mid-year sales dips can be improved with targeted campaigns and discounts.

📅 Weekly Sales Patterns

- **Highest Sales Days:** Tuesday, Sunday
- **Lowest Sales Day:** Wednesday

📌 *Insight:*
Customer activity peaks on specific days, allowing optimization of marketing campaigns and promotional timing.

⏰ Hourly Order Trends

- **Peak Hours:** Evening (6 PM – 8 PM)

📌 *Insight:*
Most customers place orders during evening hours, making it the ideal time for running ads and flash sales.

👩 Customer Demographics

- **Primary Customer Segment:** Female (100%)

📌 *Insight:*
The business is highly focused on a female customer base, suggesting opportunities for targeted product design and marketing.

🏆 Top Performing Products

- Magnum Set
- Quia Gift
- Dolores Gift

📌 *Insight:*
Premium gifting products contribute significantly to revenue and can be leveraged through bundling and upselling strategies.

🚀 Business Recommendations

- Introduce targeted marketing campaigns during low-performing months
- Improve visibility and promotion for underperforming categories
- Focus on high-performing cities for expansion strategies
- Optimise delivery logistics to reduce delivery time

- Launch time-based offers during peak evening hours
- Develop personalized campaigns for female customers

🛠️ Tools & Techniques Used

- Microsoft Excel
- Pivot Tables & Pivot Charts
- Data Cleaning & Transformation
- Data Modeling (Relationships)
- Dashboard Design & Visualization

📌 Conclusion

This dashboard highlights key business insights and performance patterns, enabling stakeholders to make informed decisions. It demonstrates how Excel can be effectively used as a powerful tool for **business intelligence and data analysis**.
